DETAILED ACTION

Allowable Subject Matter

Claims 1, 3-13, 15-20, 22-29, 31-36, 38-46, 48-53, 55-72 and 103-106 are allowed.

The following is an examiner's statement of reasons for allowance: Essentially, the arguments presented by applicant in the response of December 1, 2003 are persuasive. The amendments to the claims overcome the prior art, because the prior art fails to disclose each of the elements of the claims as amended. In particular, there is no suggestion of a molecular model comprising a first elongated strand and a second elongated strand, where the first segment and the second segment are adapted to be interconnected in a single orientation, or in one of two orientations, along with a connecting leg extending between the first elongated strand and the second elongated strand along a third path corresponding to the vector along which the force acts on the first element and the second element. Also, the argument made with respect to the rejections made under 35 USC 112 are persuasive.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
